Direct Drive

Tubeaxial Fans

Republic offers a complete line of high flow direct drive tubeaxial fans. Designed for use in low to medium pressure ducted applications the Republic Direct Drive Tubeaxial Fans may be mounted either horizontally or vertically. They are generally used for removal of contaminated air or hot air found in industrial applications; but can also be used to supply air through duct work for cooling or pressurizing interior spaces. The low-maintenance, oil-free design provides continuous, dependable service.

Standard Features Include:

- ▲ Spark resistant, cast aluminum propellers or heavy-duty steel propellers
- ▲ Statically balanced to assure smooth operation
- ▲ Shafts that are turned, ground, and polished or stainless steel
- ▲ Continuously-welded drum seam

Applications:

- ▲ Air purge ventilation
- ▲ Commercial fryer exhaust
- ▲ Compressor room exhaust
- ▲ Dust hood exhaust
- ▲ Fume exhaust
- ▲ Glass cooling
- ▲ Hazmat room exhaust
- ▲ Paint spray booth
- ▲ Welding booth
- ▲ Wood molding machinery
- ▲ Incinerators
- ▲ Powder booths
